

# kheelona.com

## Website Content Document

*All 9 pages. Section by section. Developer and designer ready.*

### How to read this document

Each page is broken into sections exactly as they appear on screen, top to bottom. Every section has a structure note for the designer, the copy for the developer to use as-is, and keywords already woven into the text.

Blue boxes = copy. Use the text exactly as written.

Yellow boxes = notes for the developer or designer—action required before building.

A keyword map is on the final page.

# Page 1: Home

Route: / | Split: 40% Lumi, 40% PlayOS, 20% other (safety, stories, trust)

Design reference: [yunastories.com](https://yunastories.com) — warm illustrated children's brand, full-bleed scenes with product character, stacked alternating feature sections, soft illustrated backgrounds, large serif-style headline font, card-based testimonials, clean footer stats bar.

The warmest page on the site. A parent lands here cold. By the end of the scroll, they feel the product, understand it, trust it, and have reserved one.

## SECTION 02 Hero

SMALL LABEL ABOVE HEADLINE

For ages 3 to 6

HERO HEADLINE (DISPLAY FONT, 56-72PX DESKTOP)

**The smartest way to grow your child's brain is to understand their heart.**

Lumi is a screen-free AI robot toy that listens first, then talks back. Really talks. In the years a brain grows fastest. The more Lumi understands how your child feels, the more they learn.

In all 10 languages you speak at home.

**[ BUTTON ] Reserve Lumi at Rs. 4,999**

Rs. 9,999 after launch. No payment now. We hold the price, you hold your place.

Keywords: AI robot toy, AI toys, talking toys, voice toy for kids in multiple languages

## SECTION 03 Why we exist

SECTION LABEL (SMALL CAPS, BRAND GREEN)

WHY WE EXIST

**Your child's best years deserve more than a screen.**

Between the ages of 3 and 6, a child's brain builds faster than it ever will again. What they hear, what they feel, and who they talk to shape everything that follows.

Most toys do one thing. Screens do too much. Lumi does the one thing that matters: it listens to your child, understands how they feel, and talks back in a way that helps them grow.

Keywords: brain development toys, cognitive development toy for toddlers, developmental toys, educational toys

## SECTION 04 Meet the feelings

### SECTION LABEL (SMALL CAPS)

#### MEET THE FEELINGS

##### **Learning starts with feeling understood.**

Lumi knows five feelings. They are the engine behind everything your child learns.

##### **Card 1: Curious**

Asks why. Chases ideas. Wants to know what is around the corner.

##### **Card 2: Grumpy**

Has opinions. Not always wrong. Needs to be heard, not hushed.

##### **Card 3: Sad**

Sits with you. Does not rush past. Makes space for the hard moments.

##### **Card 4: Silly**

Cannot sit still. Turns everything into a game. Laughter is learning too.

##### **Card 5: Joy**

Lights up. Celebrates. Reminds your child that they are wonderful.

*Keywords: interactive toys, interactive learning toy for curious kids, learning toys for kids*

## SECTION 05 Meet Lumi — 40% of page

### BLOCK A — HERO PRODUCT INTRO

#### **Meet Lumi. The friend who listens first.**

Lumi is a smart toy for children aged 3 to 6. It is not a tablet. It is not a speaker. It is a talking toy that holds a real conversation with your child.

Say the wake word, and Lumi is ready. It asks questions. It remembers what your child said yesterday. It grows with them across the ages of 3 to 6.

### BLOCK B — SCREEN-FREE FEATURE

#### **Screen-free. A real conversation.**

No display. No video. Nothing to stare at. Just a voice that talks back. Made to be kept, not outgrown. Lumi adapts to where your child is, not just how old they are.

### BLOCK C — PARENT APP

#### **You see everything.**

The parent app gives you a window into every conversation. A daily summary, the full conversation log, and complete control over topics, time, and languages.

**[ BUTTON ] Reserve Lumi at Rs. 4,999**

*Keywords: smart toys, robot toy, AI robot toy, talking toys, toys for kids, educational AI toy for child brain growth, toy to reduce screen time for toddlers in India*

BLOCK A — PLAYOS INTRO

**The technology behind the talking.**

Lumi runs on PlayOS, Kheelona's own voice engine built from the ground up for children aged 3 to 6. One platform. One set of safety rules. Every product in the family runs on the same soul.

BLOCK B — ON-DEVICE PROCESSING

**Think about the device first.**

When your child speaks, PlayOS processes the conversation on the device before anything goes anywhere. It reads the feeling behind the words, not just the words. Low latency. No long waits. No sending everything to a distant server.

BLOCK C — SAFETY ARCHITECTURE

**Every response is the right response.**

Before Lumi speaks, every response passes through an age-graded safety layer. On-device and cloud filters work together. No open internet. No random content. No surprises. PlayOS is what makes Lumi a cognitive development toy, not just a toy that plays sounds.

SECTION LABEL

**How Lumi compares.**

A simple, honest look at what is out there.

|                            | Lumi     | Smart toys | Phone / TV | Static toys |
|----------------------------|----------|------------|------------|-------------|
| Screen-free                | Yes      | Varies     | No         | Yes         |
| Holds a conversation       | Yes      | Limited    | No         | No          |
| Speaks your language       | Yes (10) | Rarely     | Varies     | No          |
| No open internet           | Yes      | Rarely     | No         | Yes         |
| The parent sees everything | Yes      | Partial    | Partial    | No          |
| Made for ages 3 to 6       | Yes      | Varies     | No         | Varies      |

## SECTION 08 Safety strip — 20% of page

### Safe in their hands. Careful with their words.

Lumi listens only when your child says the wake word. The microphone is off the rest of the time.

Every conversation passes a safety check before Lumi speaks. You can read and delete any conversation with one tap.

Your child's voice data is never sold.

**[ BUTTON ] Read how we built safety in**

## SECTION 09 Parent voices

### SECTION LABEL (SMALL CAPS, TERRACOTTA)

#### WHAT PARENTS ARE SAYING

### Families who have met Lumi.

[Testimonial 1 — real quote, parent name, child age, city — founder to provide with consent]

[Testimonial 2 — real quote, parent name, child age, city — founder to provide with consent]

[Testimonial 3 — real quote, parent name, child age, city — founder to provide with consent]

## SECTION 10 From the journal

### SECTION LABEL

#### FROM THE JOURNAL

### Raising curious kids.

Ideas and honest reads for parents who want more than a screen.

Card 1: "Why three to six are the years that matter most" — A short, warm read on the window when a child's brain grows fastest.

Card 2: "Screen-free does not mean silent" — What a rich, language-filled childhood actually looks like.

**[ BUTTON ] See all stories**

## SECTION 11 Footer CTA
